Donald Hogan, Manager
Research and Statistics Branch

Carlos Cracraft
Chief Labor Market Analyst

Earl Turley, Jr., Supervisor
Reports Section

Prepared in affiliation with the Employment and Training Administration and the Bureau of Labor Statistics, U.S. Department of Labor

February, 1994

Preface

The Service Delivery Area Annual Labor Market Planning Information Reports are published by the Kentucky Cabinet for Human Resources, Department for Employment Services. They are designed to satisfy information needs generated by the Job Partnership Act of 1982.

Stuart Owen of the State and Local Planning Information Unit prepared this report under the direction of Earl Turley. The work of Karla Green, who typed the report, is greatly appreciated. Lane Butler also contributed to preparing the report. Any questions, comments, or suggestions should be directed to Earl Turley, Department for Employment Services, Research and Statistics Branch, CHR Building, 2nd Floor East, 275 East Main, Frankfort, Kentucky, 40621, (502) 564-7976.

Job Training Partnership Act of 1982

The purpose of the Job Training Partnership Act (JTPA) of 1982 is to establish programs to prepare youth and unskilled adults for entry into the labor force and to afford job training to economically disadvantaged adults and other individuals facing serious barriers to employment who are in special need of such training.

Programs have been established under JTPA to provide remedial education, job training and other employment services. Under JTPA there are a number of target groups that are of primary interest to planners. JTPA also aims to assist and retrain people in the labor force whose jobs have been or are expected to be jeopardized by the economy shifting from being manufacturing based to service and information based.

JTPA, while federally funded, is administered at the state and local levels of government. The JTPA Act requires several of its responsibilities to be executed at the state and local levels.

Under JTPA, Service Delivery Areas (SDAs) were created. SDAs are regions within the state where job training programs are implemented and local area employment and training planning are accomplished.

The JTPA Act established that a Private Industry Council (PIC) is to formulate and implement objectives and goals. A PIC is established within each SDA and is a consortium of persons from various sectors of both the private and public economic markets. A majority of PIC members are chosen from the private sector.

Even though the PIC in each SDA is empowered with policy and oversight responsibilities, it is the governor of the state who has the approval authority over locally developed plans and the responsibility for monitoring local program compliance.

The need for reliable and accurate labor market information is stated in Sections 125, 461, through 465. The purpose of these Service Delivery Area reports is to provide data and information that will fulfill as best as possible those stated objectives of the Act.

These reports contain a wide range of demographic, labor market, educational and socio-economic data that will be useful to planners and other users in the upcoming program year.

LABOR FORCE

The labor force consists of all persons in the noninstitutional population over 16 years of age who were either employed or unemployed, including members of the Armed Forces. To be counted as employed, one must (a) have worked for pay of profit during the survey week, or (b) have been temporarily absent from a job which he or she would return. To be counted as unemployed, one must (a) have no job, (b) be available for work, and (c) be actively seeking work. The unemployment is calculated by dividing the unemployed by the labor force. The labor force in simple formula force is:

$$\text{Total Labor Force} = \text{Total Employed} + \text{Total Unemployed}$$

$$\text{Unemployment Rate} = \frac{\text{Total Unemployed}}{\text{Total Labor Force}}$$

There are two terms the user of this report should become familiar with, 'not in the labor force' and discouraged workers. 'Not in the labor force' includes persons who did not work or actively seek employment within a specified time period. Examples of persons 'not in the labor force' include housewives (over fifty percent), students going to school (over ten percent), disabled persons unable to work (less than five percent), and the rest were scattered among volunteers, some seasonal workers, persons doing only incidental unpaid family work, and discouraged workers. Discouraged workers are one of the target population groups covered by the Job Training Partnership Act of 1982 and as such is of special interest. A discouraged worker is briefly defined as someone who does not have a job and has not been actively looking for work during the past four weeks.

Kentucky Labor Force Highlights

* Kentucky's civilian labor force decreased by 23,000 workers from 1990 to 1992, a drop of 1.3 percent.

* The 1992 unemployment rate was recorded at 6.9 percent, 1.1 percentage points higher than in 1990.

* The civilian labor force participation rate was 60.7 percent for the state in 1992.

Unemployment Insurance Covered Employment Highlights

* The U.I. covered employment data are derived for the ES-202 program which most employers are required to comply with by law. Agricultural workers, proprietors, self-employed workers, unpaid volunteer or family workers, and domestic workers in households are some of the employment groups excluded from U.I. coverage.

* From 1990 to 1992, total covered employment in the state increased by 36,187 workers, a gain of 2.6 percent.

Top Occupations in Kentucky through 2000

All of the 800 plus occupations for which projections were made reveal an outlook; however, the outlook varies significantly among these occupations. Occupations with a high volume of employment, concentrated in growing industries, and found in many industries will have a better outlook than those with lower employment levels and found in one or a few industries, especially declining ones.

The occupations with a better outlook, or a high degree of employability, are listed in the following high-demand and fast-growing occupational tables. A total of 200 met criteria for one of the two categories, while 28 met criteria for both. These 172 will account for over 56 percent of all annual average job openings during the 1987-2000 period.

The basis for selection of the 100 high-demand occupations was a minimum of 125 job openings each year.

SERVICE DELIVERY AREA EMPLOYMENT TOTALS DO NOT ADD TO STATEWIDE TOTAL DUE TO SOME EMPLOYEES NOT BEING CLASSIFIED TO ANY SPECIFIC COUNTY.

Employment, Hours and Earnings Highlights

* Total nonagricultural employment in 1992 had risen by 66.0 percent from 1970, and by 24.9 percent from 1980.

* Manufacturing employment in 1992 had increased by 12.6 percent from 1970, and by 4.0 percent from 1980.

* In 1992, nonmanufacturing had risen by 86.8 percent from 1970, and by 31.0 percent from 1980.

* Of the manufacturing categories, only textiles and apparel, paper and publishing, and transportation equipment registered increases in employment since 1980. Of these three, transportation equipment experienced the largest percentage increase at 93.2 percent.

* Of the nonmanufacturing categories, all but mining and quarrying experienced increases in employment since 1980. Services and retail trade led the way in growth with respective rates of 66.6 and 42.0 percent.

* In 1992, average weekly earnings in the manufacturing industries had increased by $132.79 since 1982. The average workweek had risen by 1.9 hours, and average hourly earnings had risen by $2.90.

* Average weekly earnings for nondurable goods in 1992 had risen by $115.01 since 1982. The average workweek had risen by 0.6 hours and average hourly earnings were up $2.79.

* In 1992, average weekly earnings in durable goods had risen by $148.83 since 1982. The average workweek had increased by 3.0 hours and average hourly earnings were up by $2.97.

* The Consumer Price Index, using the average index from 1982-1984 as a benchmark of 100, stood at 145.8 for November, 1993. Every month revealed a rise in the index.

Economically Disadvantaged

The Office of Management and Budget (OMB) in Washington regularly issues poverty level guidelines to be used in determining whether individuals meet the economically disadvantaged criteria of the Job Training Partnership Act (JTPA). There are actually three guideline tables, two metropolitan and one non-metropolitan, comprised of different counties within the state.

Section 4 (8) of JTPA defines the term "economically disadvantaged." Among other things, the term means an individual who is a member of a family that had received a total family income for the 6-month period prior to application for the program involved that, in relation to family size, was not in excess of the higher of the poverty level determined in accordance with the criteria established by the Director of the Office of Management and Budget (OMB) or 70 percent of the Lower Living Standard Income Level.

NON-METROPOLITAN TABLE

The 1993 70% of
Lower Living Standard Eligibility Income Level

Family Size	JTPA Only
1	$6,970*
2	9,430*
3	11,890*
4	14,350*
5	16,880
6	19,740

For each additional member add: $2,860

This Non-metroplitan table is to be used when certifying applicants from the following counties:

Adair	Crittenden	Hopkins	Marshall	Powell
Allen	Cumberland	Jackson	Martin	Pulaski
Anderson	Edmonson	Johnson	Mason	Robertson
Ballard	Elliott	Knott	Meade	Rockcastle
Barren	Estill	Knox	Menifee	Rowan
Bath	Fleming	Larue	Mercer	Russell
